

B-I-C Speaker Systems are designed to the highest possible value and performance standards. Our confidence in their quality is such that B-I-C America offers customers this transferable seven-year limited warranty:

B-I-C Speaker Systems Seven-Year Limited Warranty

If the B-I-C speaker system proves to be defective in materials or workmanship within seven years from the date of the original customer's purchase, we will, at our option, repair or replace the defective product.

DISCLAIMER

THE WARRANTY STATED HEREIN IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE AND ALL OTHER LIABILITIES AND OBLIGATIONS OF B-I-C AMERICA, ALL OF WHICH ARE EXPRESSLY DISCLAIMED. B-I-C AMERICA HAS NOT MADE AND DOES NOT HEREBY MAKE ANY OTHER REPRESENTATION, WARRANTY OR COVENANT WITH RESPECT TO THE CONDITION, QUALITY, DURABILITY, DESIGN, OPERATION, CAPACITY, FITNESS FOR USE OR SUITABILITY OF THE B-I-C SPEAKER SYSTEMS.

Exclusion of Certain Damages

B-I-C America's liability for any defective product is limited to repair or replacement of the product at our option. B-I-C America shall not be liable for incidental or consequential damages of any kind or character because of product defects.

Some states do not allow limitations on implied warranties and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply.

This Warranty Does Not Cover:

Damage caused by abuse, accident, misuse, negligence, or improper operation.

Products that have been altered or modified.

Any product whose serial number has been altered, defaced, or removed.

Normal wear and maintenance.

Damages caused by shipping. (All claims for shipping damage must be made with the carrier.)

Warranty Service

Warranty service must be performed by an authorized service center, usually a B-I-C speaker systems dealer or its authorized agent. You may obtain a list of authorized service centers by writing to the address below.

All warranty repairs must be accompanied by the original bill of sales. No other document is acceptable or is required.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Due to our continual efforts to improve product quality as new technology and techniques become available, B-I-C America reserves the right to revise Speaker Systems specifications without notice.

Owner's Manual

Model DV32CLR

Specifications

Frequency Response	Characteristic Sensitivity	Nominal Impedance	Recommended Amplifier Power	Dimensions	Shipping weight
75Hz - 20kHz	90dB @ 1 watt, 1 meter	8 ohms	5 - 125 watts	10 ³ / ₄ " W 4 ³ / ₄ " H 6" D	4 lbs.

Certified BEST VALUE Performance

Unpacking

Carefully remove your new DV32CLR speaker from the box. Inspect the speakers for transit damage. If you discover damage, contact your dealer immediately.

Save your carton – it is the best possible protection for your speakers should you ever have a need to move them.

The Optimum Listening Position

Refer to figure 1 for 5.1 surround speaker placement. The DV32CLR center channel

speaker should be placed as close to the TV as possible, preferably directly above or below the TV. The front channel speakers should be placed at least 6 feet apart (TV/monitor center) to create proper stereo imaging. The rear channel surround speakers should be positioned behind and slightly to the sides of the viewer/listener. It may take some experimentation with different locations for the surround speakers to suit your preference and your room.

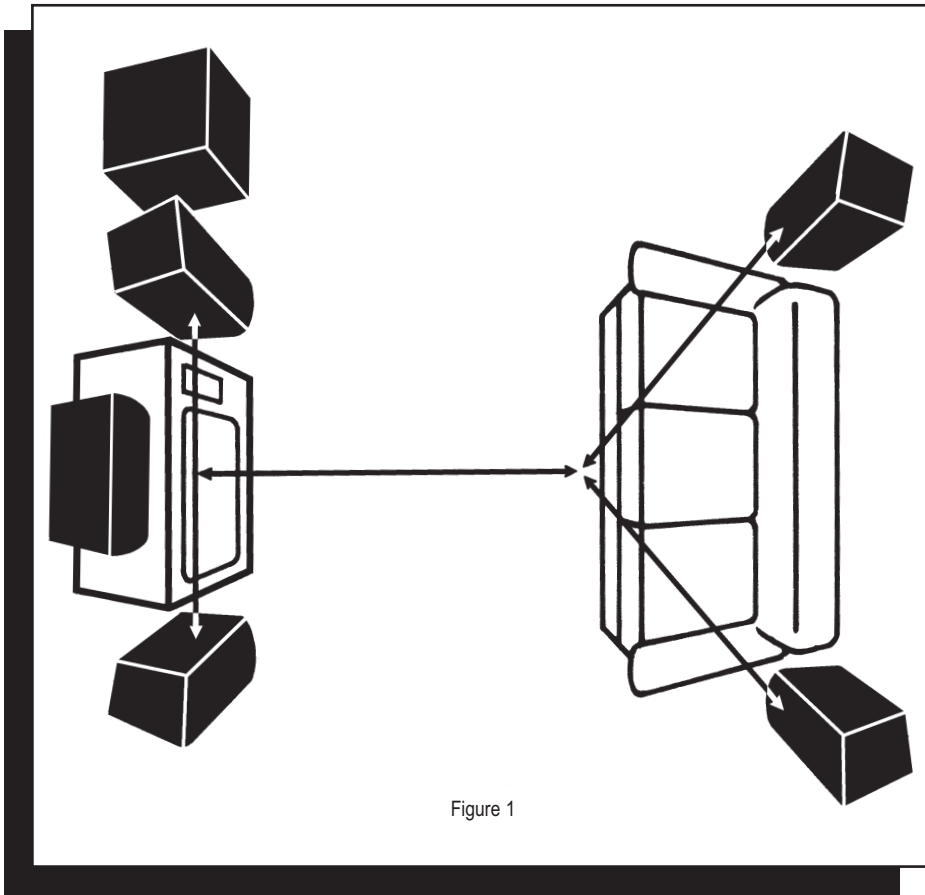

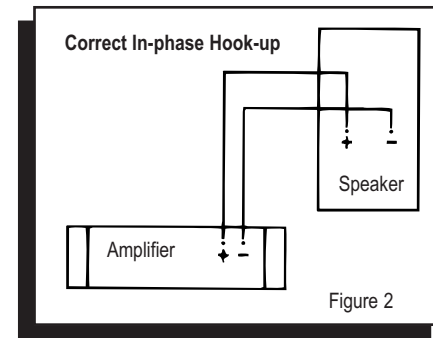

Figure 1

Hooking Up Your DV32CLR Speakers

STOP! – Make sure that you consult your amplifier's owner's manual regarding speaker hook-up. Your amplifier should be turned off throughout this procedure.

A word about speaker wire – There are a number of quality speaker wire products available today. Most of these products offer obvious sonic benefits over lamp cord and light gauge wires. The choice of speaker wire is dependent on the type of amplifier, the distance you intend to run the wire, and your budget, among other things. If in doubt as to which brand or type of wire and connector to use, consult your audio dealer.

Most speaker wire is polarity coded. This means that each conductor is labeled either (+) positive or (-) negative. The (+) positive side may be a different color or texture than the (-) negative side. On the back of your amplifier, each channel is probably labeled (+) and (-) as well as color coded red for (+) positive and black for (-) negative. B-I-C speaker terminals are color coded red for (+) positive and black for (-) negative. Be sure to hook (+) to (+), (red to red), and (-) to (-), (black to black). (See Figure 2.)

All connections should be tight and close fitting. Inspect connections for frays and stray strands of wire touching both (+) and (-) terminals. (This will cause a short and, perhaps, damage your equipment.)

Caring for Your Speakers

The DV32CLR speaker can be cleaned with a damp soft cloth. The metal grille can be cleaned with the same cloth, or if needed, a small hand vacuum.

Troubleshooting and Service

Your DV32CLR speaker does not use external fuse protection or circuit breakers because these devices tend to impede sound quality and may only protect the speaker to a marginal degree. Rather, we use components and designs of the highest caliber as an effective method of protecting the speaker. However, no amount of protection will prevent damage caused by defective associated equipment or extreme abuse.

If you have a problem, first try to determine if it is indeed a speaker problem. Determine whether the problem exists in two speakers when hooked to the same channel. If it does, the problem likely originates in some other component in the system. If the problem is in one speaker only, reverse your speaker leads (left to right, right to left) to make sure the speaker is not out of phase. If the speaker was out of phase, switching the wires should solve the problem.

If you have determined that you have a speaker problem, contact your dealer for authorized factory service information. If you are unable to contact your dealer, if your dealer is unable to solve your problem, or if you have any questions or comments regarding your B-I-C Speaker System, please contact us at:
